

In most parts of the world, people are living longer.

What is the possible **cause of this situation?**

Is this a negative or positive development?

In several countries across the world, the **death rate** has decreased dramatically. This may be due to several reasons and this essay will analyse those and also suggest whether it brings benefit or drawback to the society.

First and foremost reason for this scenario is the revolution of **healthcare** technology. This is because the **fatal** diseases or **disorders** which were considered difficult to fight against have become an easier task to tackle these days. **Polio** is one good example in India which no longer causes death or disorder among people which once was a very **devastating** disease. Moreover, the technical advancements are also facilitating complicated **cardiac surgeries**, **organ transplantation** and **3D printed organ** replacement. So these illustrations are proving the worthy role of technology in enriching and enhancing of people's life.

While the **lifespan** of individuals' increases, it would obviously **benefit** in several ways both to individual and society. **As far as a single person is concerned**, if he lives longer then it is certain that he would complete all his responsibilities in a proper way and lead a happy and contented life with his or family. Looking onto the other side, the benefits outnumber the disadvantages here as well. Due to the contribution of persons like **scientists**, **politicians** and other leaders to the nation for a longer duration, the development of the nation is a reachable goal.

By and large, the people are having healthy and longer life because of the **intervention of technology in the healthcare sector**. This has been proven as a positive impact on both individuals and a larger community and thus can be taken as a sign of **betterment**.

Healthcare – sog'likni saqlash
Fatal – o'limga olib keluvchi
Disorder – kasallik
Devastating – vayron qiluvchi
Cardiac surgery – yurak jarrohligi
Organ transplantation – o'rgan ko'chirish
3d printed organs –
Enrich – boyitmoq
Enhance – improve
Lifespan – hayot davomiyligi

In most parts of the world, people are living longer.

What is the possible **cause** of this situation?

Is this a negative or positive development?

Introduction

1.Paraphrase

2.Ushbu essayda men shu holatga sabab bo'lgan omillarni yozaman va nima uchun bu holatni pozitiv ekanligi aytaman.

Ushbu holatga bir necha sabablar bor. Birinchidan, hozirgi paytda meditsina juda yaxshi rivojlangan. Oldinlari insonlari kasalliklardan o'lib ketgan, hozirda esa ko'p kasalliklarni davosi topilgan. Lekin mening essay yozishimni davosi topilmadi. Odamlarnig uzoq yashashiga yana bir sabab bu davlar orasidagi urushlarning kamayganligi. Hozirgi paytda deyarli hamma davlat o'z hududiga ega va yer bosib olish uchun urushlar kamaygan. Oldinlari ko'plab insonlar urushlar sababli halok bo'lgan hozir esa hotirjam uyida televizor ko'rib o'tirishi mn.
