

Some people believe that children should study all subjects at school, while others think they should only study subjects they are good at or find interesting.

Discuss both these views and give your own opinion.

Whether children should be required to study all subjects in school or focus solely on those they excel at or find intriguing is a matter of ongoing debate. This essay will explore both perspectives and provide reasons in favour of allowing young learners to study subjects that they feel passionate about or are good at.

On the one hand, proponents of a comprehensive curriculum argue that exposing children to a wide range of subjects is essential for their intellectual development and future success. They contend that a well-rounded education equips students with a broad skill set and knowledge base, enabling them to adapt to various challenges and opportunities in the future. For instance, a student who excels in mathematics but neglects humanities may miss out on valuable critical thinking and communication skills that are crucial in many professions.

Conversely, there is a valid argument for allowing students to concentrate on subjects of personal interest or aptitude. Tailoring the curriculum to individual preferences can foster a deeper passion for learning and result in higher academic achievement. When students are genuinely engaged in a subject, they are more likely to

excel and **pursue related careers**. For example, a student with a natural talent for music who is permitted to **specialize** in this area may become a **virtuoso** musician, **enriching** their own life and the cultural landscape.

In my opinion, it is more **advantageous** for children to focus primarily on subjects they excel in or have a keen interest in. This approach **not only** fosters a sense of **enthusiasm** for learning **but also** allows students to develop their unique talents and strengths more effectively.

In conclusion, children should **predominantly** study subjects in which they excel or have a genuine passion. This tailored approach to education can significantly **enhance** their learning experience, motivation, and overall academic and personal development.

Excel at smt – zo’r bo’lish

Intriguing – interesting

Passion – qiziqish

Passionate about –

Comprehensive – har tomonlama

Curriculum – o’quv dasturi

Expose to smt – duch kelmoq

Well-rounded – har tomonlama rivojlangan

Set – to'plam

Adapt – moslashish

Miss out – o'tkazib yuborish

Aptitude – qobilyat

Valid – asosli

Foster – rivojlanishiga zamin yaratish

Tailor smt to – moslashtirish

Genuine – haqiqiy

Pursue career in –

Specialize – ixtisoslashsa

Virtuoso – musiqa ustasi

Enrich – boyitmoq

Advantageous – foydali

Predominantly – asosan

Enhance – improve
