

The environmental problems that today's world is facing are so great that there is little ordinary people can do to improve the situation. So governments and large organizations should be responsible for reducing the amount of damage being done to the environment.

To what extent do you agree or disagree?

Nowadays, environmental issues have become bigger and more crucial than at any time in the past. Some believe that **authorities**, large firms and manufacturers can **play a fundamental role in** reversing the **detrimental** damages done to the environment while ordinary people have little to contribute. **From my perspective**, although the government and large companies must **take immediate actions** to save the earth, people have an important role to play.

The earth is **confronting devastating threats**, and **it is imperative to take some radical moves** by the authorities immediately. For example, authorities should dedicate a large amount of budget to improve the **public transport infrastructures** and **enact strict regulations** and laws regarding usage or ownership of **private vehicles**. They generate a **considerable volume of greenhouse gases**, **which** are considered the main **culprit** behind global warming. Moreover, it should be compulsory for companies to be based on **renewable resources of energy** for their productions. Also, they should limit their productions to the proportion of demand because **mass production** not only **threatens the natural resources** but is also primarily responsible for endless rubbish and **harmful pollutants** that overwhelmingly harm nature.

In addition to the actions required by the government and organisations, people need to be **active in saving** the mother planet. **Little choices** they make can have a big impact. **To cite an instance**, the way we **dispose of** our household waste can make a difference. If we separate the biodegradable and non-biodegradable garbage from the **origin**, from homes, it will effectively reduce the **recycling strain**, **which** is profoundly **time, money, and energy-consuming**. Furthermore, the more they become aware of the environment and understand how **crucial** it is to protect it, the more **sustainable** and healthier the world becomes.

In conclusion, governments and large companies must **initiate** immediate and radical actions **for the sake of** the earth's survival, and people still can play a significant role in **diverse** aspects of the earth's well-being.

The environmental problems that today's world is facing are so great that there is little ordinary people can do to improve the situation. So governments and large organizations should be responsible for reducing the amount of damage being done to the environment.

To what extent do you agree or disagree?

Body	Key idea	Key vocab
Introduction	People have important role to play	Authorities Play a fundamental role Detrimental Take immediate actions
Body 1 Government and companies	Take some radical moves	Confront devastating threats It is imperative Public transport infrastructure Enact strict regulations Private vehicles Main culprit behind global warming Renewable resources of energy Mass production Threatens natural resources Harmful pollutants
Body 2 Individuals	Active in saving planet	Little choices make bit impact Dispose of household waste Biodegradable and non-biodegradable garbage Reduce recycling strain Time/ money / energy consuming Crucial Sustainable and healthier world
Conclusion	Initiate immediate and radical actions	People still can play a significant role in diverse aspects of the earth's well-being

Authority – government

Play a fundamental role in ... – play important role

Reverse – ortga qaytarish

Detrimental – negative

From my perspective – in my opinion,

Take immediate action – darhol chora ko'rish

Confront – duch kelmoq

Devastating – buzg'unchi / vayron qiladigan

Imperative – very important

Take a radical move – keskin chora ko'rish

Private vehicle – shaxsiy avtomobil

Public transport infrastructure – jamoat transporti

Enact strict regulations – qat'iy qonunlar kiritish

Considerable – a lot

Volume – miqdor

Greenhouse gases – zararli tutunlar

Culprit – aybdor

Refer – shunga

Renewable resources of energy – qayta tiklanuvchi energiya manbalari

Compulsory – majburiy

Mass production – ommaviy ishlab chiqarish

Limit the production – ishlab chiqarishni cheklash

Harmful pollutants – zararli kimyoviy moddalar

Overwhelmingly – o'ta katta darajada

Dispose of – halos bo'lish

Household waste – maishiy chiqindi

To cite an instance – for example

Biodegradable – chirydigan

Non-biodegradable – chirimaydigan

Origin – boshidan

Reduce strain – qayta ishlashga bo'lgan bosimni kamaytiradi

Time / money / energy + consuming – ko'p vaqt / pul / energiya talab qiladigan

Profound – ulkan

Sustainable – barqaror

Crucial – important

Initiate – boshlash

For the sake of - ... haqqi

For God's sake – Xudo haqqi

Diverse – har hil

Well-being – salomatlik
